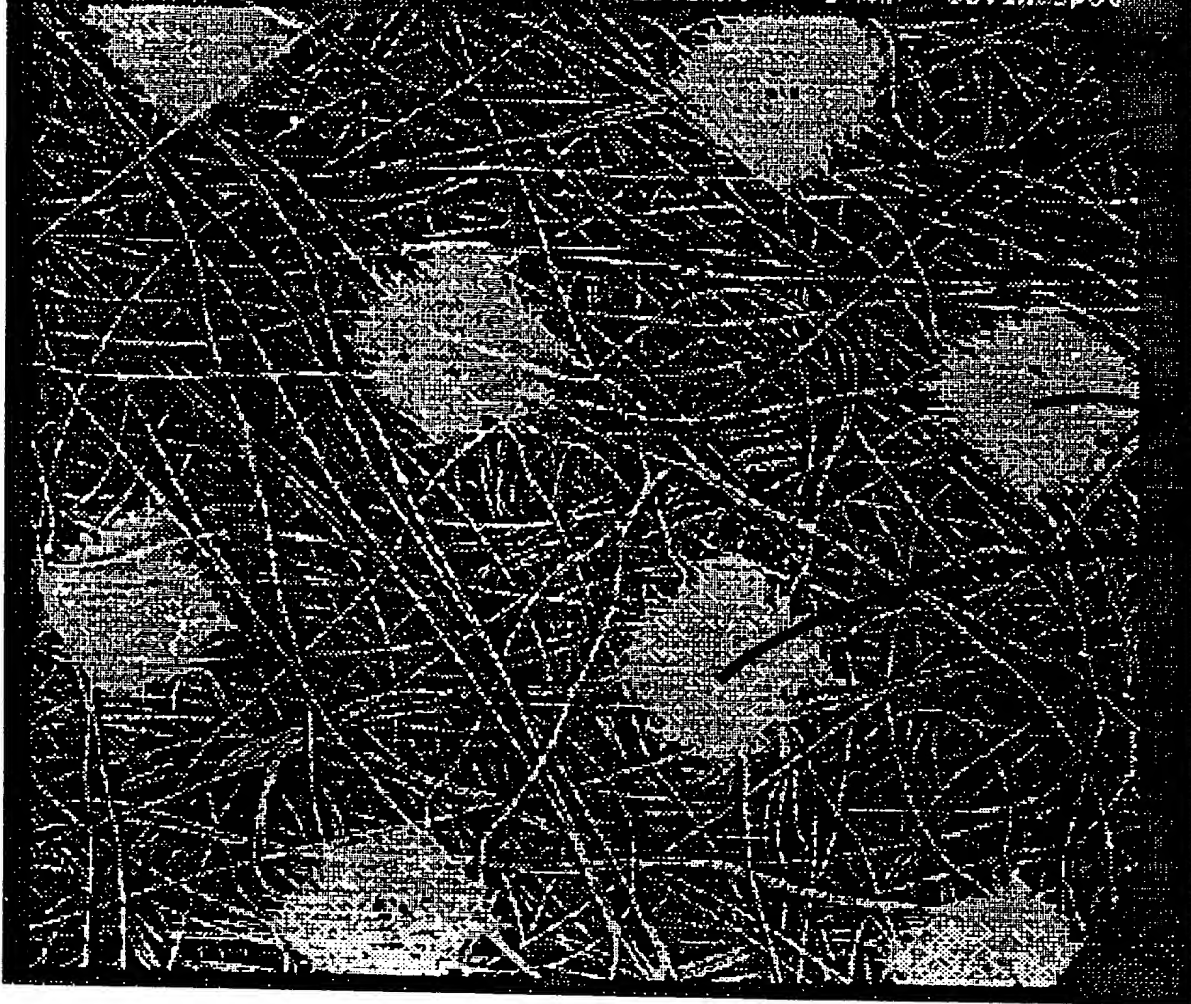

Fig 2

A high-contrast, black and white photograph of a dense thicket of tall grasses or reeds. The image is taken from a low angle, looking up through the foliage, creating a sense of being deep within the vegetation. The blades of grass are long, thin, and arching, with some showing distinct vertical ribbing. The lighting is harsh, resulting in a stark contrast between the bright, almost white highlights on the grass blades and the deep, solid black shadows in the recesses of the thicket. The overall texture is very busy and intricate, with many overlapping lines and patterns. The image has a grainy, high-contrast quality, similar to a halftone print or a high-contrast photocopy.
